

# README

## Movement Matters

Jason Terry

This repository contains all scripts used in this project along with the data. The most important ones are “advanced\_models\_final.ipynb,” “data\_accessss.ipynb,” “visualizations.ipynb,” “totals.ipynb,” and all of the “.py” scripts (these are for the dash visualizations). The other scripts were used, but many of them are in a basic form that was abandoned and integrated into one of the newer scripts.

numbers\_sylum\_seekers\_monthly\_99\_18\_wltaly.csv, status\_asylum\_seekers\_99\_18\_wltaly.csv, battle\_deaths.csv, and who\_gdp are the raw downloaded datasets. all\_merged.csv is the final csv that is the result of merging all of the cleaned raw data. All “grouped\_” csv files contain all data for that specific combination of origin and destination.
